

fehlende Entities

- HACS → Watchman download
- Watchman als Dienst / Service hinzufügen
- Entwickertools

The screenshot shows the Watchman report interface. At the top, there's a header with a search icon and the text "Report watchman.report". Below it is a button labeled "Run the Watchman report". A "Force configuration parsing" checkbox is checked, with a note explaining it parses configuration files before generating the report. There's also a "Advanced options" dropdown and a "Help" link.

On the left, a sidebar lists "Ergebnis in den Benachrichtigungen". The main area is titled "Benachrichtigungen" and contains the following text:

```
-== Watchman Report ==  
-== Congratulations, all 6 actions from your config are available!  
-== Missing 2 entity(ies) from 14 found in your config:  
light.hue_essential_spot_1 [missing] in: scripts.yaml:92,101  
light.esszimmer [missing] in: scripts.yaml:106  
-== Report created on 27 Oct 2025 06:50:44  
-== Parsed 7 files in 0.14s., ignored 12 files  
-== Generated in: 0.00s. Validated in: 0.00s.
```

A timestamp "Vor 19 Sekunden" is visible at the bottom right of the message area.
