

# Reolink Cams

## Einrichtung

- Die Cams müssen erstmal mit der Handy App eingerichtet werden!
- ! Es gibt nicht sofort einen HTTP Server! Der muss erst aktiviert werden!

## Dienste

- Network → Server Settings → Set Up

**Server Settings**

Name	Port
<b>Basic Service</b> Reolink's basic network services. When disabled, you cannot access devices via Reolink Client/App.	<b>9000</b>
<p>⚠ After changing the following settings, you will log out of the device from the browser and need to log in again.</p>	
<b>RTMP</b> <input checked="" type="checkbox"/> Audio and video communication services based on RTMP between devices and Flash Player on browsers.	<b>1935</b>
<b>HTTP</b> <input checked="" type="checkbox"/> Access control services based on HTTP between devices and browsers. When HTTPS is enabled and HTTP is disabled, HTTP access will automatically jump to HTTPS.	<b>80</b>
<b>HTTPS</b> <input type="checkbox"/> Access control services based on HTTPS between devices and browsers.	<b>443</b>
<b>RTSP</b> <input checked="" type="checkbox"/> Audio and video communication services based on RTSP between devices and third-party applications.	<b>554</b>
<b>ONVIF</b> <input checked="" type="checkbox"/> Access control services based on ONVIF between devices and third-party applications. To use ONVIF, you need to enable RTSP first.	<b>8000</b>
<b>Save</b>	

## Falschmeldungen

- Sicherstellen das man auch den richtigen Tripper in HA verwendet. Es gibt Bewegung, Fahrzeug, **Person** und Tier.

- Bewegung registriert alles mögliche und löst schnell aus ...
- Abstellen kann man das in der Cam Config
